
AFRICAN GIG ECONOMY & DIGITAL WALLET REPORT

For the period: 2023 - 2024

Executive Summary

Africa losses an estimated \$4billion annually to scams, cyber fraudulent transactions. Recently of the 4 markets highlighted in this dataset, Kenya according to “EASTLEIGH VOICE”:

‘Notably, 2.3 per cent of transaction attempts involving consumers in the country in 2025 were suspected of digital fraud. While this was below the global average of 3.8 per cent, it was the second-highest rate among the African countries analyzed, behind South Africa.’

For the period 2023 -2024, Africa’s Gig Economy recorded transactions across different channels, and workers from different markets. The records were to try and highlight the risks the each channel and markets face.

The dataset Contains;

- 4 Dimension tables: Channel, Market, Dates, Workers
- 1 Fact table: Transactions history

Tables:

1. Channel: contains the different channels and sub channels that the transactions were made through
 2. Market: contains the 4 markets
 3. Dates: Period within which the transactions took place.
 4. Workers: the different workers in different countries and gig segments
- Transaction History: contains all the transactions made within the given period

Project Objectives

Transactions

1. Total:
 - a. Amount Transacted ✓
 - b. Fraudulent transactions✓
 - c. Transactions ✓
 - d. Amount lost in fraud ✓
 - e. YOY change for each ✓
 2. Which markets had the highest transactions? ✓
-

- Which channels had the highest transactions?
- The monthly trend of transactions through the period.

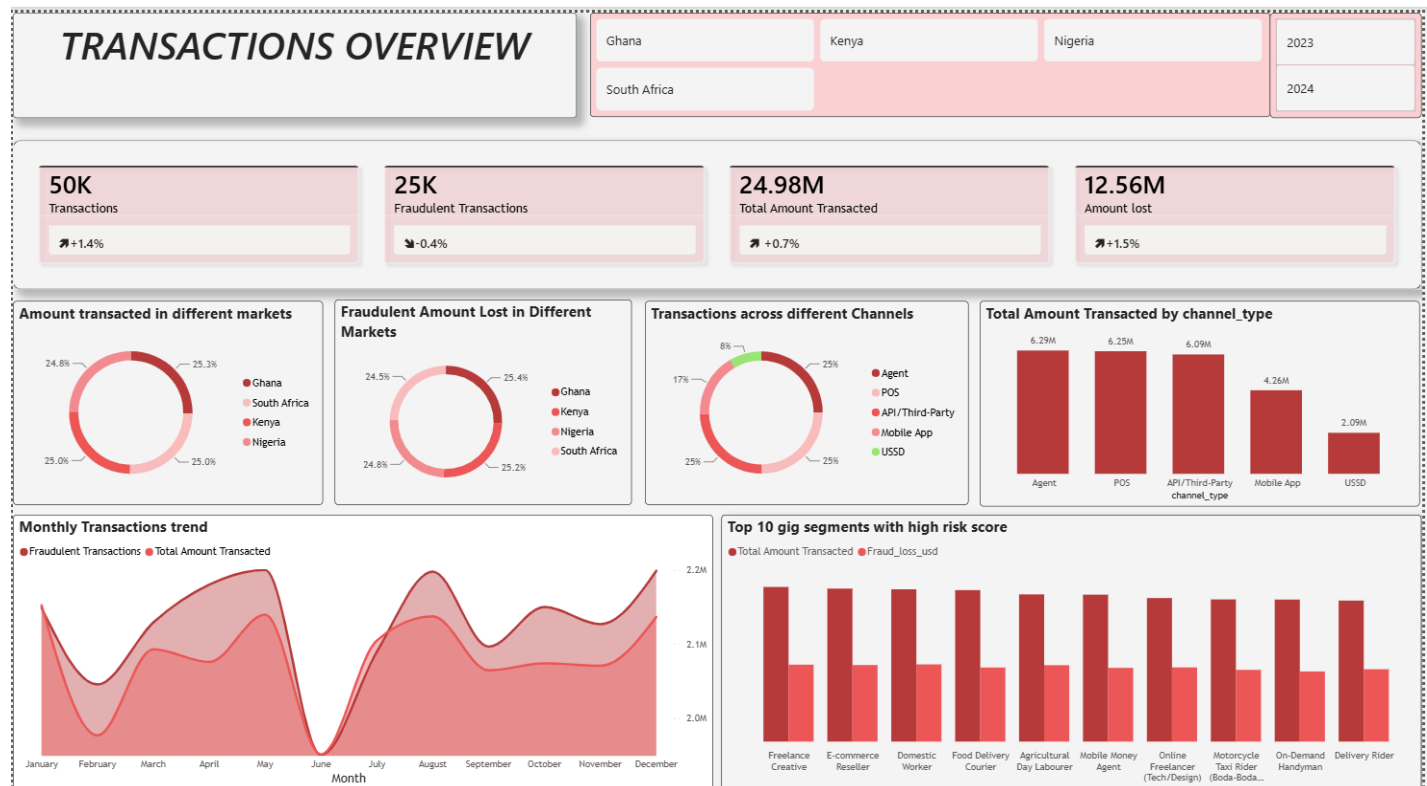

Risks

- Average risks score
- Risks score by country.
- Risks score by the gender
- What age band had the highest risks score?
- Monthly trend of the risks throughout the period

Workers

- What is the number of workers & active workers?
- What is the average account tenure?
- Risk categories

Previews

Analysis Findings

Transactions

- There were **50K** transactions which was a **+1.4%** increase from the previous year, of those transactions **25K** were **fraudulent** transactions. This was a **-0.4%** from the previous year fraudulent transactions
- **24.98Million** was the total amount transacted an increase of **+0.7%** from the previous year. **12.56Million** was the amount lost in fraudulent transaction with an increase of **+1.5%**.
- **Ghana** had the highest transaction rate at **25.3%**, while **Kenya and South Africa** had **25% each** and **Nigeria** with **24.8%** of the total Amount transacted
 - a. **Ghana led in fraudulent transactions at 25.4%, Kenya at 25.2%, South Africa 24.8% and Nigeria at 24.5%**
- Agent, POS & API / Third party channel all were at **25%**
 - Mobile App: **17%**
 - USSD: **8%**

Risks

- Nigeria had the highest risk score at 25.1%, Kenya & Ghana at 25%, and South Africa at 24.9%
- Non-binary & male genders had 25% risks score, and Female 24%. While 26% preferred not to say their gender.
- POS was at the highest risk of

Workers

- Total **40** workers
- **2,441workers** are Active
- Each worker averaging an **20 Transactions**

Recommendations

1. **Strengthen fraud detection and prevention**, with immediate attention to the exceptionally high fraud levels identified in the dataset.
 2. **Prioritize POS, Agent and API/Third-Party channels for enhanced monitoring**, particularly POS due to its high risk score.
 3. **Investigate the increase in fraudulent transaction value despite a decline in fraudulent transaction count**, focusing on high-value fraudulent transactions.
 4. **Implement worker- and market-level risk segmentation** to identify high-risk workers and determine whether risk scores are predictive of fraud.
 5. **Promote lower-risk, efficient digital channels where supported by the data**, while maintaining appropriate controls for high-risk channels.

Power BI

DAX Measures Reference

YOY change measures: shows the percentage increase or decrease from the previous year(2023)

1. Amount lost
2. Transactions, total amount, fraudulent transactions
3. Fraud rate
4. Reversed transactions

Workers Measures:

1. Active Worker
2. Average Transactions per active worker

Added Column

1. Risk Categories: categories the risk scores into 4.
 - a. Critical
 - b. High
 - c. Moderate
 - d. Low
